Concept # 1

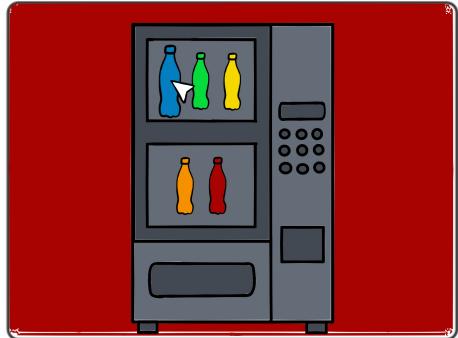

Notes Soda machine 5 color website navigation

The website starts off with a soda machine.

Hovering your mouse over a bottle will make it enlarge and wiggle back and forth.

The bottle will enlarge after hovering mouse over it.

The bottle will wiggle back and forth as long as the mouse stays hovering over the bottle.

The bottle continues to wiggle until you click on the bottle.

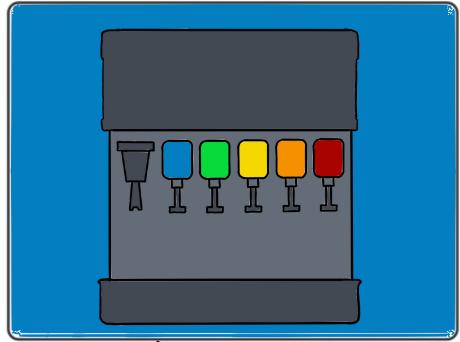

After clicking on the bottle, you will be sent to a webpage with the same color background as the bottle, and a bottle of the same color will drop into the slot.

Notes Fountain soda machine 5 color navigation webpage

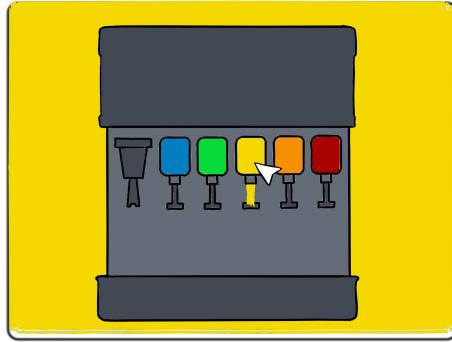

Concept # 2

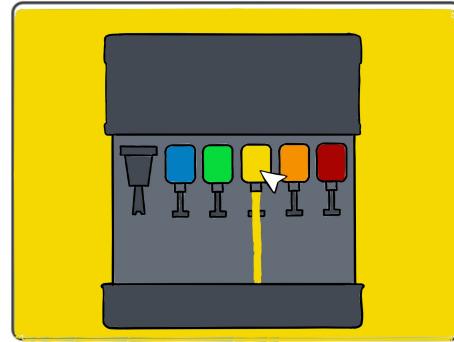

The opening webpage is a fountain soda machine.

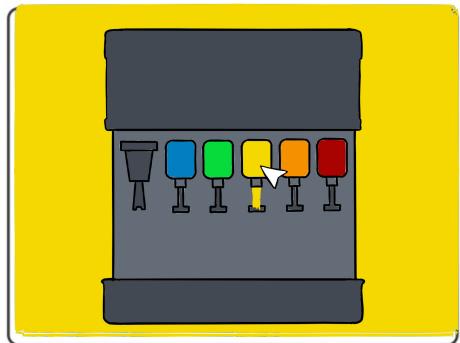

If you hover your mouse over one of the colors, the sides of the box will darken showing the selection.

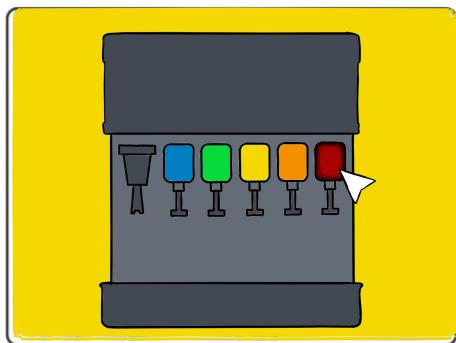

After clicking on the color you will be redirected to a webpage where the color you clicked is the background color, and soda will start to pour out of the color.

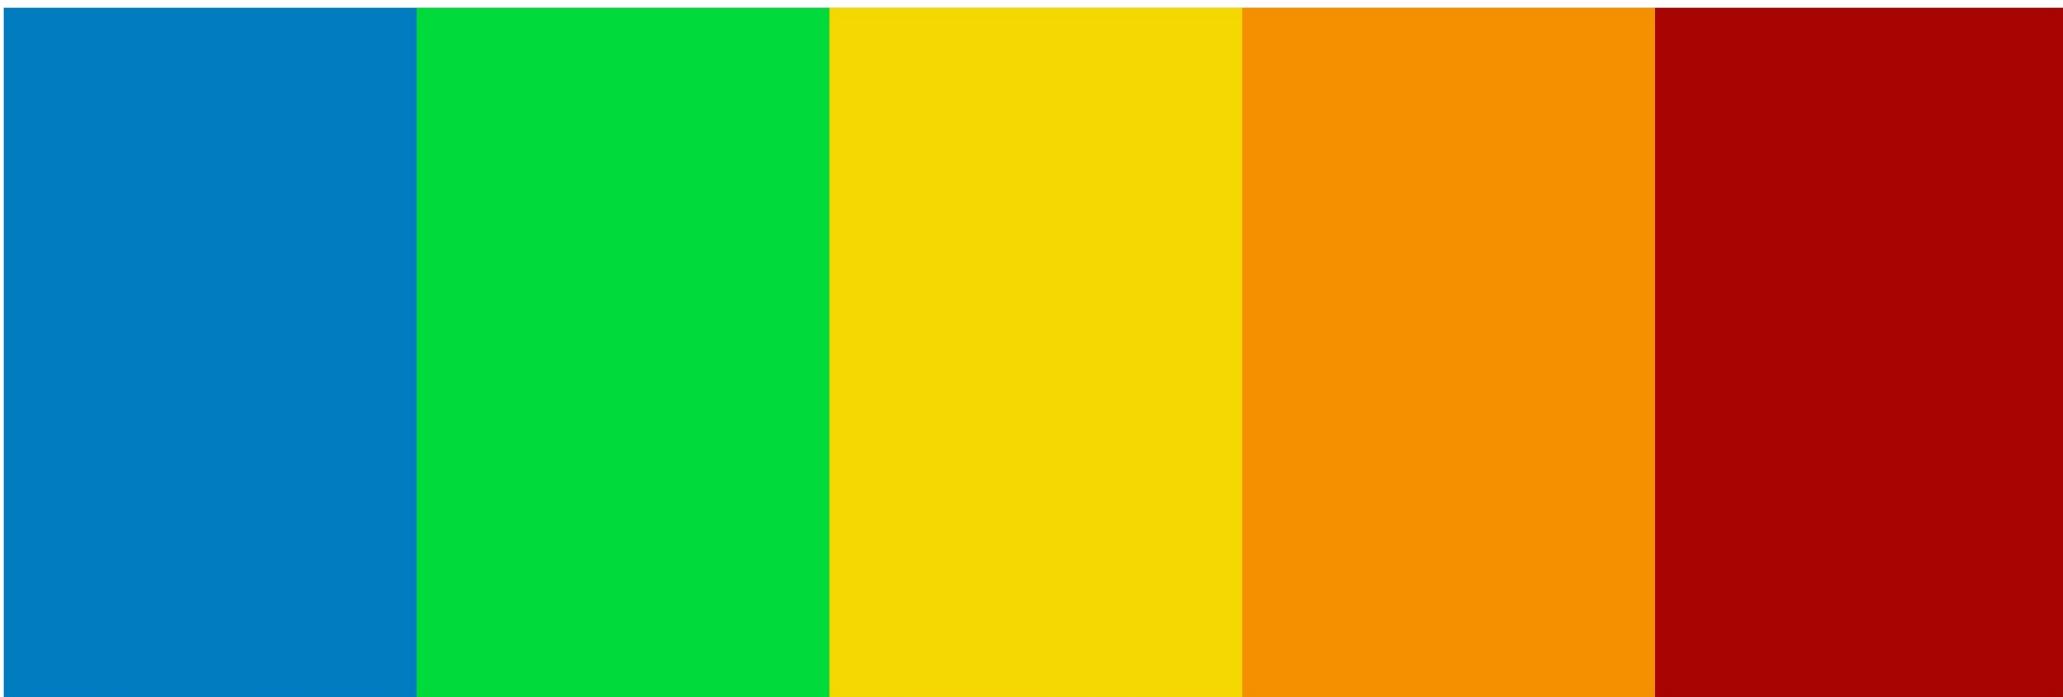

The soda will pour out for 5 seconds or until the next color is clicked.

After the soda stops pouring out the background will stay the same, but more soda will now pour out unless the color is clicked again.

The process repeats with every color

Notes Coffee maker CSS Navigation Website with 5 colors

Concept # 3

The opening webpage is a coffee maker with a cup.

When the mouse hovers over a color square a shadow appears to simulate pushing a button and a red light will appear.

After clicking on the color, you will be redirected to a webpage with the color you clicked on as the background. A second red light will turn on and your coffee will begin to brew.

The coffee will begin to fill up the cup finishing after 5 seconds.

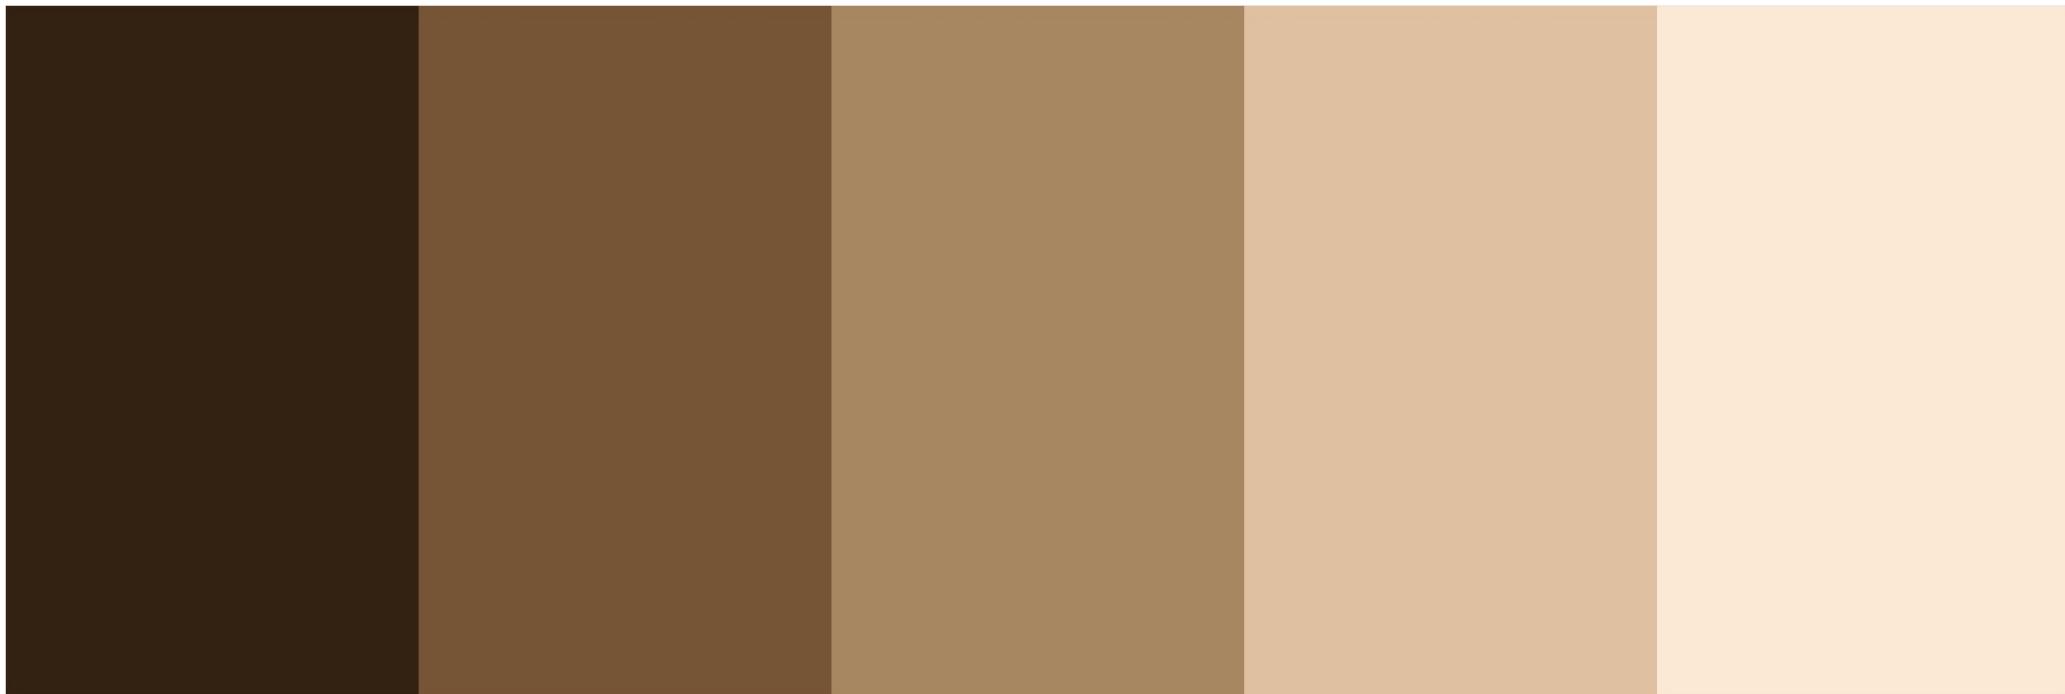

The coffee will continue to pour out until the 5 second "brewing" is done or another color is selected. The red lights will also turn off once brewing is finished.

Once the cup is filled the page will stay on the same until another color is pushed.
